<b>Exhibitor Introduction</b>	<p>Since Eugene Tech succeeded in mass-producing Single type LPCVD equipment for the first time in the world, it has mass-produced plasma treatment and plasma cleaning equipment one after another, and is a semiconductor equipment company with product lines such as batch type ALD and metal ALD. In particular, it is the only domestic company with a system that can acquire/develop advanced technologies like the top tier of semiconductor equipment by having a core technology center in Silicon Valley, and it is a mid-sized company that is striving toward the top 10 of the world's semiconductor equipment.</p>	
<b>Exhibit Description</b>	<p>Introduce Eugene Tech's latest equipment and promote the company using panels and brochures in the booth</p>
