Exhibitor Introduction	<p>The College of Semiconductor at Gachon University, the first institution of its kind in Korea, is dedicated to cultivating talent for the advanced semiconductor industrial fields crucial to our nation and society. We achieve this by continuously integrating rapidly evolving technological advancements into our programs. To fulfill our educational objectives in these cutting-edge fields, we offer a comprehensive curriculum rooted in the principles and applications of semiconductor devices and design, with a strong foundation in electronic engineering.</p> <p>As of 2024, the College of Semiconductor at Gachon University was selected for four major national talent development projects: the "Semiconductor Specialization Project" for undergraduate programs, the "4th Stage Brain Korea 21 (BK21) Project" for graduate programs, and both the "Leading University Nurturing Project" and the "Leading Graduate School Nurturing Project" for early employment departments. These projects will further accelerate our efforts in nurturing semiconductor talent.</p>	
Exhibit Description	The introduction of Leading University Nurturing Project	
Exhibit Product	The introduction leaflet of Leading University Nurturing Project
