Exhibitor Introduction	<p>Here at Tokyo Electron, our philosophy is to “contribute to the development of society with the best technology and service”</p> <p>This is TEL’s means of existence and social mission. The semiconductor production equipment handled by us will support the state-of-the-art industrial technology and enable the evolution of various electronic industries. Based on our philosophy, Tokyo Electron Korea has continuously built trust with its customers since its founding in 1993 and has made efforts to further develop society. We are “A leading global company that has greatly contributed to TEL Group’s sustainable growth and maximizing corporate value through our semiconductor production equipment. This was accomplished by adding high added value of leading industries with unique proposals to blend diverse technologies and persuasive power”</p> <p>Tokyo Electron will contribute to the realization of the social shared value of “digital and eco-friendly” by utilizing our expertise as a leader in the semiconductor production equipment industries and all management resources. We ask for your continued support.</p>
